## Notes on BrAPI documentation

### Metadata

Metadata are not consistently used in examples.

- Empty pagination is sometimes ‘null’ or ‘{}’; should be ‘{}’.
- Status object is described as list of objects (which is ok) but examples use just one object. E.g.: ‘{“message”: “”, “exception”: {}}’; but should be: ‘[{}, ...]’.
- Empty status object should therefore be rather: ‘“status”: []’
- Paging: although the intro says that page counting starts with page = 0 all (?) examples show a 1.

## Notes on BrAPI implemenation of sweetpotatobase
